Cross Sectional Shape:

Fibre or composition with wire insert

Outside Diameter:

4.500 inches

Cross-sectional Thickness:

0.094 inches

Lubrication Method:

Impregnated

Special Features:

6 slots 0.234 in. Wide, 3 slots 0.180 in. Wide 3 slots 0.130 in wide

Lubrication Material:

Rubber silicone class q

Material:

Steel comp 302 and wool

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
