Cross Sectional Shape:

Cup

Cross-sectional Height:

0.562 inches

Center Hole Diameter:

Between 5.002 inches and 5.008 inches

Peripheral Diameter:

6.000 inches

Angle:

45.0 degrees

Special Features:

Chamfer one edge of id 45 degrees by 0.032 in. Depth from bearing surface, one 0.219 in. Diameter locating hole drilled through from od to id and 0.219 in. From the bearing surface opposite the chamfered edge, hole to be countersunk 82 degrees and 0.344 in. Diameter on od only

Material:

Plastic phenolic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
