Cross Sectional Shape:

Metal with soft filler

Hole Diameter:

Between 0.2087 inches and 0.2287 inches

Bolt Circle Diameter:

Between 3.422 inches and 3.453 inches

Outside Diameter:

Between 3.844 inches and 3.906 inches

Cross-sectional Thickness:

Between 0.016 inches and 0.078 inches

Material:

Asbestos and copper alloy

Material Specification:

Hh-p-46 federal specification 1st material response and qq-c-576 federal specification 2nd material response

Specification Or Standard:

1 type and e style

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
