Cross Sectional Shape:

Cup

Cross-sectional Thickness:

Between 0.018 inches and 0.022 inches

Cross-sectional Height:

Between 0.089 inches and 0.099 inches

Center Hole Diameter:

Between 0.290 inches and 0.292 inches

Peripheral Diameter:

Between 0.439 inches and 0.441 inches

Material:

Copper alloy

Material Specification:

Sae 70 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
