Cross Sectional Shape:

O-ring

Cross-sectional Height:

Between 0.135 inches and 0.143 inches

Center Hole Diameter:

Between 0.853 inches and 0.865 inches

Material:

Rubber synthetic

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
