Cross Sectional Shape:

Plain rectangular, straight face

Outside Diameter:

12.8600 inches

Ring Style:

Expanding concentric

Radial Wall Thickness:

Between 0.1230 inches and 0.1270 inches

Overall Width:

0.2170 mils and 0.2210 centimeters

Joint Style:

Vertical joint

Material:

Aluminum alloy

Material Specification:

Ams 4120 assn standard single material response

Fsc Application Data:

Aircraft eng, reciprocating

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A08400
