Cross Sectional Shape:

Spherical

Cross Section Inside Diameter:

Between 2.469 inches and 2.531 inches

Cross Section Outside Diameter:

Between 2.649 inches and 2.711 inches

Cross-sectional Length:

Between 3.438 inches and 3.562 inches

Special Features:

Flanged on each end 0.250 in. W by 0.090 in. Thk and precompressed to 0.065 in. Maximum thk both ends

Material:

Cotton and glass or cotton and glass and rubber silicone class q

Material Specification:

Ecc-128 fscm 43999 mfr ref 1st material response or ecc-164 fscm 43999 mfr ref 2nd material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A527p0
