## **Cross Sectional Shape:**

Spherical

**Cross Section Inside Diameter:** 

Between 1.969 inches and 2.031 inches

# **Cross Section Outside Diameter:**

Between 2.149 inches and 2.211 inches

#### Cross-sectional Length:

Between 3.438 inches and 3.562 inches

#### **Special Features:**

Flanged on each end 0.250 in. W by 0.090 in. Thk and precompressed to 0.065 in. Maximum thk both end

### Material:

Cotton and glass or cotton and glass and rubber silicone class q

#### **Material Specification:**

Ecc-128 fscm 43999 mfr ref 1st material response or ecc-164 fscm 43999 mfr ref 2nd material response

#### Shelf Life:

N/a

## Unit Of Measure:

Demilitarization:

No

## Fiig:

A527p0
