Cross Sectional Shape:
Cup
Cross-sectional Thickness:
Between 0.050 inches and 0.060 inches
Cross-sectional Height:
Between 0.100 inches and 0.110 inches
Center Hole Diameter:
Between 0.695 inches and 0.705 inches
Peripheral Diameter:
Between 0.948 inches and 0.958 inches
Material:
Aluminum alloy 2024
Material Specification:
Qq-a-225/6, t4 federal specification single material response
Surface Treatment:
Anodize
Fsc Application Data:
Fuel control system, jet engine, aircraft
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A032a0
