Cross Sectional Shape:

Cup

Cross-sectional Thickness:

Between 0.050 inches and 0.060 inches

Cross-sectional Height:

Between 0.100 inches and 0.110 inches

Center Hole Diameter:

Between 0.695 inches and 0.705 inches

Peripheral Diameter:

Between 0.948 inches and 0.958 inches

Material:

Aluminum alloy 2024

Material Specification:

Qq-a-225/6, t4 federal specification single material response

Surface Treatment:

Anodize

Fsc Application Data:

Fuel control system, jet engine, aircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
