Cross Sectional Shape:

Metal

Outside Diameter:

Between 14.157 inches and 14.187 inches

Aperture Diameter:

13.937 inches

Cross-sectional Thickness:

Between 0.110 inches and 0.125 inches

Material:

Aluminum alloy 5056

Material Specification:

Ams 4182 assn standard single material response

Fsc Application Data:

Radar altimeters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
