Cross Sectional Shape:

Rectangular metal

Hole Diameter:

Between 0.217 inches and 0.232 inches

Bolt Circle Diameter:

1.400 inches

Aperture Diameter:

0.810 inches

Outside Corner Radius:

0.250 inches

Cross-sectional Thickness:

0.010 inches

Special Features:

Center corrugation, 1.000 in. Diameter to center line of corrugation, 120 degrees bolt hole corrugation, 0.180 in. Radius bolt hole center to center line of corrugation

Material:

Steel comp 347

Material Specification:

Ams 5512 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
