Cross Sectional Shape:

Circular

Fabrication Method:

Solid

Nonmetallic Hardness Rating:

50.0 shore durometer a

Min. Tensile Strength (psi):

1500 pounds per square inch

Length:

Between 46.594 inches and 46.718 inches

Surface Condition:

Smooth

Cross Section Outside Diameter:

Between 0.129 inches and 0.149 inches

Environmental Protection:

Oil resistant or fuel resistant

Color:

Any acceptable

Material:

Rubber, synthetic, cured

Material:

Rubber synthetic

Specification Or Standard:

1 class or 3 class

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
