**Cross Sectional Shape:**

Circular

**Fabrication Method:**

Solid

**Nonmetallic Hardness Rating:**

50.0 shore durometer a

**Min. Tensile Strength (psi):**

1500 pounds per square inch

**Length:**

Between 46.594 inches and 46.718 inches

**Surface Condition:**

Smooth

**Cross Section Outside Diameter:**

Between 0.129 inches and 0.149 inches

**Environmental Protection:**

Oil resistant or fuel resistant

**Color:**

Any acceptable

**Material:**

Rubber, synthetic, cured

**Material:**

Rubber synthetic

**Specification Or Standard:**

1 class or 3 class

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A26800
