Tempurature Rating:

500.0 degrees fahrenheit

Accommodated Shaft Diameter:

0.969 inches

Seal Width:

Between 0.376 inches and 0.406 inches

Case Style:

Recessed

Housing Bore Diameter:

1.500 inches

Sealing Element Style:

Angular

Material:

Steel case

Material Specification:

Ams 7278 assn standard single material response sealing element

Fsc Application Data:

Gear box, jet engine, air craft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
