Cross Sectional Shape:

Metal and synthetic rubber

Temperature Rating:

-65.0 degrees fahrenheit and 350.0 degrees fahrenheit

Cross-sectional Thickness:

0.165 inches

Gage Ring Thickness:

0.125 inches

Maximum Pressure Rating:

50.0 pounds per square inch

Material:

Rubber butadiene-acrylonitrile class nbr and aluminum alloy 6061

Surface Treatment:

Tin alloy

Fsc Application Data:

Propulsion section, guided missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
