Cross Sectional Shape:

Single lip

Accommodated Shaft Diameter:

Between 2.6245 inches and 2.6250 inches

Seal Width:

0.375 inches

Housing Bore Diameter:

Between 3.749 inches and 3.752 inches

Construction:

Solid

Special Features:

Sealing member to consist of viton sealing element

Material:

Stainless steel internally molded-in reinforcement

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
