Tempurature Rating:

75.0 degrees fahrenheit

Criticality Code Justification:

Zzzy

Maximum Pressure Rating:

1500.0 pounds per square inch

Fsc Application Data:

Nuclear reactor primary system

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
