Cross Sectional Shape:

C-section w/ helical spring

Tempurature Rating:

-20.0 degrees fahrenheit and 450.0 degrees fahrenheit

Accommodated Shaft Diameter:

Between 0.308 inches and 0.318 inches

Seal Width:

Between 0.084 inches and 0.094 inches

Housing Bore Diameter:

Between 0.436 inches and 0.438 inches

Construction:

Solid

Material:

Plastic polytetrafluoroethylene sealing element

Material Specification:

18-8ss, fscm 03933 mfr ref single material response sealing element

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
