Cross Sectional Shape:

C-section w/ helical spring

Tempurature Rating:

400.0 degrees fahrenheit

Accommodated Shaft Diameter:

Between 3.118 inches and 3.132 inches

Seal Width:

Between 0.170 inches and 0.185 inches

Housing Bore Diameter:

Between 3.374 inches and 3.378 inches

Construction:

Solid

Material:

Plastic polytetrafluoroethylene sealing element

Material Specification:

Ams 3651 assn standard single material response sealing element

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
