**Cross Sectional Shape:**

C-section w/ helical spring

**Tempurature Rating:**

400.0 degrees fahrenheit

**Accommodated Shaft Diameter:**

Between 3.494 inches and 3.506 inches

**Seal Width:**

Between 0.161 inches and 0.177 inches

**Housing Bore Diameter:**

Between 3.752 inches and 3.764 inches

**Construction:**

Solid

**Material:**

Plastic polytetrafluoroethylene sealing element

**Material Specification:**

Ams 3651 assn standard single material response sealing element

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A032a0
