Cross Sectional Shape:

Rectangular

Fabrication Method:

Cellular, unexploded

Min. Tensile Strength (psi):

40 pounds per square inch

Temperature Rating:

-100.0 degrees fahrenheit and 480.0 degrees fahrenheit

Length:

19.000 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

0.380 inches

Cross-sectional Width:

0.250 inches

End Application:

An/alq13 (v)

Material:

Rubber mil-r-46089 grade m or rubber r-10480 fscm 71643

Material:

Rubber mil-r-46089 grade m or rubber r-10480 fscm 71643

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
