Cross Sectional Shape:

Spherical

Cross Section Inside Diameter:

2.392 inches

Cross Section Outside Diameter:

2.500 inches

Cross-sectional Length:

Between 0.815 inches and 0.820 inches

Special Features:

One 0.250 in. Diameter hole on one side and one 0.173 in. Diameter hole on opposite side

Material:

Plastic

Material Specification:

Ams 3651 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A527p0
