Cross Sectional Shape:

Circular

Min. Tensile Strength (psi):

1200 pounds per square inch

Tempurature Rating:

-80.0 degrees fahrenheit and 250.0 degrees fahrenheit

Length:

29.000 inches

Cross Section Outside Diameter:

Between 0.135 inches and 0.143 inches

Material:

Rubber, ams 7271

Material:

Rubber butadiene-acrylonitrile class nbr

Material Specification:

Ams 7271 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
