**Cross Sectional Shape:**

Circular

**Min. Tensile Strength (psi):**

1200 pounds per square inch

**Tempurature Rating:**

-80.0 degrees fahrenheit and 250.0 degrees fahrenheit

**Length:**

29.000 inches

**Cross Section Outside Diameter:**

Between 0.135 inches and 0.143 inches

**Material:**

Rubber, ams 7271

**Material:**

Rubber butadiene-acrylonitrile class nbr

**Material Specification:**

Ams 7271 assn standard single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A26800
