Cross Sectional Shape:

Single lip

Accommodated Shaft Diameter:

Between 0.679 inches and 0.680 inches

Seal Width:

Between 0.459 inches and 0.460 inches

Housing Bore Diameter:

1.300 inches

Construction:

Solid

Special Features:

Black oxide coated

Material:

Steel uns k24065 sealing element

Material Specification:

Ams 6470 assn standard single material response sealing element

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
