Cross Sectional Shape:

Outside grooved and beveled, straight face

Inside Diameter:

2.750 inches

Outside Diameter:

Between 3.247 inches and 3.253 inches

Ring Style:

Concentric

Outer Edge Thickness:

Between 0.249 inches and 0.253 inches

Material:

Rubber synthetic

Specification Data:

97403-13219e4287 manufacturers specification control

Fsc Application Data:

Ramp bay, boat bridge erection

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A08400
