Cross Sectional Shape:

O-ring

Cross Section Outside Diameter:

Between 0.067 inches and 0.073 inches

Cross-sectional Height:

Between 0.067 inches and 0.073 inches

Center Hole Diameter:

Between 0.234 inches and 0.244 inches

Peripheral Diameter:

Between 0.368 inches and 0.390 inches

Special Features:

Material: butyl rubber parker compound b612-70; 70 durometer, per astm d2000-70/sae j200; two tabs located 180 degrees apart on inside and outside dia, 0.005 wide by 0.003 long; used on gta-1

Material:

Rubber

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
