Cross Sectional Shape:

Spherical inside recessed

Recess Diameter:

Between 5.525 inches and 5.535 inches

Cross Section Inside Diameter:

5.500 inches

Cross Section Outside Diameter:

5.710 inches

Recess Length:

Between 0.810 inches and 0.940 inches

Cross-sectional Length:

Between 1.500 inches and 1.620 inches

Raised Diameter Length:

Between 1.090 inches and 1.120 inches

End Application:

Aircraft c18a

Material:

Rubber butadiene-acrylonitrile class nbr

Material Specification:

Ams 3202 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A527p0
