Cross-sectional Thickness:

Between 0.127 inches and 0.136 inches

Cross-sectional Height:

Between 0.750 inches and 0.752 inches

Rim Surface Width:

Between 0.190 inches and 0.210 inches

Center Hole Diameter:

Between 2.156 inches and 2.158 inches

Peripheral Diameter:

Between 2.995 inches and 3.005 inches

Special Features:

Counterbored on flanged end to diameter of 2.320 in. Min and 2.330 in. Maximum and flanged grooved to 0.010 in. Radius

Material:

Steel comp 440c

Material Specification:

Ams 5630 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
