Cross-sectional Height:

0.970 inches

Peripheral Diameter:

Between 9.895 inches and 9.905 inches

End Application:

Steam turbine general electric ser no. 1a2097 and 128372

Special Features:

Consists of four segments

Material:

Copper alloy

Material Specification:

B11g21a, fscm 01289 mfr ref single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
