Cross Sectional Shape:

Outside grooved, concave face

Inside Diameter:

1.375 inches

Outside Diameter:

1.750 inches

Material Thickness:

0.190 inches

Ring Style:

Concentric

Criticality Code Justification:

Feat

Special Features:

Material will be in accordance with ships parts control center, activity hx quality control, manufacturing and testing specifications.

Material:

Plastic polyurethane

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A08400
