**Cross Sectional Shape:**

Square

**Fabrication Method:**

Braided

**Min. Tensile Strength (psi):**

1200 pounds per square inch

**Tempurature Rating:**

1200.0 degrees fahrenheit

**Cross-sectional Height:**

0.250 inches

**Cross-sectional Width:**

0.250 inches

**Special Features:**

Material asbestos-free garlock 127-afp

**Material:**

Nickel copper alloy and wool and carbon

**Material:**

Nickel alloy and wool and carbon

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A26800
