Cross Sectional Shape:

C-section w/ helical spring

Accommodated Shaft Diameter:

Between 1.311 inches and 1.314 inches

Seal Width:

Between 0.135 inches and 0.150 inches

Housing Bore Diameter:

Between 1.499 inches and 1.502 inches

Construction:

Solid

Material:

Plastic polytetrafluoroethylene sealing element

Material Specification:

Ams 3651 assn standard single material response sealing element

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
