Criticality Code Justification:

Zzzy

Special Features:

Material, shall be union carbide corp, graphitic sheet material, grafoil grade tg-274 with a density of at least 27.0 grams/in3/. Water leachable chlorides shall not exceed 250ppm.

Reference Number Differentiating Characteristics:

Material will be in accordance with ships parts control center activity hx quality control, manufacturing and testing specifications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
