Cross Sectional Shape:

Dual lip

Accommodated Shaft Diameter:

Between 2.246 inches and 2.254 inches

Seal Width:

Between 0.304 inches and 0.312 inches

Housing Bore Diameter:

Between 1.740 inches and 1.755 inches

Construction:

Solid

Special Features:

Steel spring

Material:

Rubber butadiene-acrylonitrile class nbr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
