Cross Sectional Shape:

Spherical

Temperature Rating:

-65.00 degrees fahrenheit and 450.00 degrees fahrenheit

Cross Section Inside Diameter:

Between 0.970 inches and 1.030 inches

Cross Section Outside Diameter:

1.160 inches

Cross-sectional Length:

Between 2.220 inches and 2.280 inches

Material:

Glass fiber and rubber fluorosilicone class fq

Material Specification:

Fiberglass cloth impregnated with silicone elastomer, cagec 76301 mfr ref single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A527p0
