Cross Sectional Shape:

Single lip

Temperature Rating:

-40.0 degrees fahrenheit and 160.0 degrees fahrenheit

Accommodated Shaft Diameter:

Between 0.497 inches and 0.503 inches

Seal Width:

Between 0.235 inches and 0.265 inches

Housing Bore Diameter:

Between 1.126 inches and 1.130 inches

Construction:

One-piece

Material:

Steel comp 302 spring

Material Specification:

Sae j405 (30302) assn standard single material response spring

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
