Accommodated Shaft Diameter:

Between 0.4995 inches and 0.5000 inches

Seal Width:

0.426 inches

End Application:

Afterbody section, torpedo mk50

Special Features:

Working fluids distilled water or calibration fluid and nitrogen, operating temp 180 degrees f max

Material:

Plastic polytetrafluoroethylene sealing element and carbon graphite sealing element

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
