Cross Sectional Shape:

O-ring

Cross Section Outside Diameter:

Between 0.100 inches and 0.106 inches

Cross-sectional Height:

Between 0.100 inches and 0.106 inches

Center Hole Diameter:

Between 8.957 inches and 9.017 inches

Peripheral Diameter:

9.193 inches

Hardness Rating:

70.0 shore durometer a

Material:

Rubber

Material Specification:

Ams 7272 assn standard single material response

Specification Data:

96906-ms9241-175 government standard

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
