Cross Sectional Shape:

Rectangular

Fabrication Method:

Cellular, unexploded

Tempurature Rating:

-100.0 degrees fahrenheit and 500.0 degrees fahrenheit

Length:

Between 2.230 inches and 2.470 inches

Surface Condition:

Smooth both sides

Cross-sectional Height:

Between 3.910 inches and 4.150 inches

Cross-sectional Width:

Between 0.094 inches and 0.156 inches

Material:

Rubber, ams 3195

Material:

Rubber silicone class q

Material Specification:

Ams 3195 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
