Cross Sectional Shape:

Spherical

Temperature Rating:

-65.00 degrees fahrenheit and 450.00 degrees fahrenheit

Cross Section Inside Diameter:

Between 2.970 inches and 3.030 inches

Cross Section Outside Diameter:

Between 3.030 inches and 3.170 inches

Cross-sectional Length:

Between 3.375 inches and 3.625 inches

Material:

Glass fiber and rubber silicone class q

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A527p0
