Cross Sectional Shape:

O-ring

Cross Section Outside Diameter:

Between 0.205 inches and 0.215 inches

Cross-sectional Height:

Between 0.205 inches and 0.215 inches

Center Hole Diameter:

Between 3.835 inches and 3.865 inches

Peripheral Diameter:

4.270 inches

Hardness Rating:

70.0 shore durometer a

Material:

Rubber butadiene-acrylonitrile class nbr

Material Specification:

Ams 7272-80 assn standard single material response

Specification Data:

96906-ms9241 government standard

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
