Cross Sectional Shape:

Rectangular

Nonmetallic Hardness Rating:

30.0 shore durometer a

Min. Tensile Strength (psi):

1000 pounds per square inch

Tempurature Rating:

-70.0 degrees celsius

Length:

150.000 inches

Surface Condition:

Any acceptable both sides

Cross-sectional Height:

1.250 inches

Cross-sectional Width:

0.500 inches

Material:

Rubber, ams 3304

Material:

Rubber silicone class q

Material Specification:

Ams 3304 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A26800
