**Cross Sectional Shape:**

Rectangular

**Nonmetallic Hardness Rating:**

30.0 shore durometer a

**Min. Tensile Strength (psi):**

1000 pounds per square inch

**Tempurature Rating:**

-70.0 degrees celsius

**Length:**

150.000 inches

**Surface Condition:**

Any acceptable both sides

**Cross-sectional Height:**

1.250 inches

**Cross-sectional Width:**

0.500 inches

**Material:**

Rubber, ams 3304

**Material:**

Rubber silicone class q

**Material Specification:**

Ams 3304 assn standard single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A26800
