Cross Sectional Shape:

O-ring

Cross Section Outside Diameter:

Between 0.425 inches and 0.442 inches

Center Hole Diameter:

Between 0.359 inches and 0.369 inches

End Application:

Compressor midframe assembly; t-58-ge-16 engine used on ch-46e

Criticality Code Justification:

Agav

Special Features:

Must conform to mil-std-413

Material:

Rubber

Material Specification:

Ams 7257 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
