Cross Sectional Shape:

Circular

Min. Tensile Strength (psi):

1000 pounds per square inch

Tempurature Rating:

260.0 degrees celsius

Length:

12.500 feet

Cross Section Outside Diameter:

0.250 inches

Special Features:

12.500 ft spiral

Material:

Lead foil and braid, nylon

Material:

Lead and plastic polyamide

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A26800
