Cross Sectional Shape:

Tee

Inside Diameter:

Between 0.311 inches and 0.312 inches

Outside Diameter:

Between 0.422 inches and 0.423 inches

Temperature Rating:

-80.0 degrees fahrenheit and 350.0 degrees fahrenheit

Cross-sectional Height:

Between 0.150 inches and 0.160 inches

Center Hole Diameter:

Between 0.311 inches and 0.312 inches

Peripheral Diameter:

Between 0.422 inches and 0.423 inches

Special Features:

Backup ring material avalon01

Height:

Between 0.150 inches and 0.160 inches

Material:

Rubber fluorosilicone class fq

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
