Cross Sectional Shape:

Tee

Inside Diameter:

Between 0.374 inches and 0.375 inches

Outside Diameter:

Between 0.485 inches and 0.486 inches

Temperature Rating:

-65.0 degrees fahrenheit and 275.0 degrees fahrenheit

Cross-sectional Height:

Between 0.207 inches and 0.217 inches

Center Hole Diameter:

Between 0.374 inches and 0.375 inches

Peripheral Diameter:

Between 0.485 inches and 0.486 inches

Special Features:

Backup ring material avalon16

Height:

Between 0.207 inches and 0.217 inches

Material:

Rubber butadiene-acrylonitrile class nbr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
