End Application:

Engine

Product Name:

Gasket, water inlet elbow

Special Features:

This is a rectangular shape with three area that extend out to go around holes, holes are 0.350 inches in diameter, the distance between top to the center of the bottom hole is 2.830 inches, the distance from center to center between the holes on the sides is 3.540 inches

Material Specification:

Grade 303/306 ems d18-5007 mfr ref single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
